WARRANTY

STEP-IN TUB provides a lifetime warranty on the door seal for the original owner. There is a 10-year limited warranty on the tub.

Tee Heater

The water jetted tub will keep the water temperature at a constant level throughout your entire bath session to ensure safety and comfort.

Grab Bar

To provide you with a sense of safety and security STEP-IN TUB offers a safety grab bar as a standard feature with all tubs. Our inside safety grab bar assists you in getting in and out of the walk-in bathtub with ease. This support rail can offer assistance for a wide range of user needs including transfers and rising from the seat.

STEP-IN TUB Product specifications:

STEP-IN TUB's unique 17" inch seat allows for easy transfer from wheelchair to seat. The access to all controls and faucets are within arms length of the user with little to no effort to operate them. The serious issue of accidental burns is eliminated by the use of our anti-scald water-mixing valve.

To ensure the satisfaction and trust of our clients, all of STEP-IN TUB's unique walk in bathtubs feature the highest-grade fiberglass molds, a steel conduit frame, and are triple gel coated.

Our state of the art Walk in Bath Tubs will provide:

STEP-IN TUB Standard Features Overview:

- Easy Entry
- Extendable Shower Head
- Hydrotherapeutic jets
- Designer Roma fit faucets
- Safety Grab Bar
- Anti Slip seat and floor
- Temperature control system
- Low Step
- Protective drain

Easy Entry and Exit - The STEP-IN TUB Walk-in Bath offers the simplest inward entrance in the industry. With our wide door opening you can be sure to enter and exit with ease! The STEP-IN TUB walk-in Bathtub entry and exit height is ideal for making your bathing experience as comfortable as possible.

Walk In Bath Inline Heater

Most traditional baths do not protect the user from receiving very hot scalding water when the bath is being filled. The inline heater will maintain the preset temperature and prevent you from such scalding water. Our system blends hot and cold water for you ensuring you never receive water temperatures that could harm you. Temperatures can be adjusted for comfort but the bather will never be introduced to a water temperature above the pre-set maximum.

Safety Grab Bars

The standard walk in bath does not have support rails located within the interior Bath. With your STEP-IN TUB walk in bath, our grab rails are offered as an option to provide you with a sense of security. Our inside corner grab bar is offered a polish chrome finish with concealed flanges and is a perfect to assist you in getting in and out of the walk-in bath. This support rail can offer assistance to a wide range of user needs, both for transfer and raising from the seat. Straight grab rails can be placed as needed.

6 Jet Hydrotherapy Therapeutic Massage

Let the STEP-IN TUB 6-jet warm air massage system add a truly therapeutic element to your walk in bath system. The centrally located directional jet massage system uses only pre-warmed air or water to refresh and soothe your aches away. Typical water jet systems are known to be too aggressive for the frail or elderly, and can be irritating to any bather after short periods of use. A warm air system allows for stimulation of the skin and is not designed to penetrate deep into the muscle. Moreover, warm air massage activates the lymphatic system, while enhancing blood circulation. An increase in blood flow is also known to help dissolve and eliminate toxins from the body. The combination of being immersed in water with a warm air system provides an incomparable therapeutic effect and offers the user that well deserved spa experience.

As our system does not re-circulate bath water you can maintain a bacteria free bathing environment, especially important when more than one person will be using the bath. The STEP-IN TUB walk in bath air system provides a user-friendly control panel that will allow you to interchange between Hydrotherapy and an air massage. This last function initiates automatically, 20 minutes after every bath use, and purges any moisture from around the jet heads to ensure no stagnant water remains between bathing sessions. No cleaning or maintenance of the airlines is ever required!

Designed Faucets and Extendable Shower Head- Our beautifully designed faucets is another way we bring you the ultimate in luxury. Our 18" inch extendable shower head assist you in getting to those hard to reach parts on your body. The exquisite chrome polish faucets allow you to put this tub in any bathroom without losing that delicate feel.

Non-Slip surface - Anti-slip floor and Anti-slip seat.

Low Step

Our tub has a state of the art walk-in door allows one to easily enter and exit the tub effortlessly and safely. Simply open the latch, walk in, and close the door. It's just that easy.

Protective Drain

Overflow resistance with secured cable pop up drain.
